

Global Micro-pump Market: Industry Market Research, Market Share, Market Size Forecast to 2027

Global Micro-pump Information, by Type (Mechanical & Non-Mechanical and others), by applications (drug delivery, biomedical) by end users - Forecast to 2027

PUNE, MAHARASHTRA, INDIA,
September 15, 2016 /EINPresswire.com/
-- Study Objectives of [Micro-pump Market](#):

- To provide detailed analysis of the market structure along with forecast for the next 10 years of the various segments and sub-segments of the Micro-pump market
- To provide insights about factors affecting the market growth
- To analyze the micro-pump market based on various factors- price analysis, supply chain analysis, porters five force analysis etc.
- To provide historical and forecast revenue of the market segments and sub-segments with respect to four main geographies and their countries- Americas, Europe, Asia-Pacific, and Middle East & Africa.
- To provide country level analysis of the market with respect to the current market size and future prospective

“

The Major Key Players are IDEX Corporation (US), Xavitech, Alldoo Micropump (China), Servoflo Corporation, Bio-Chem Fluidics, TOPS Industry & Technology Co. Ltd. and others.

”

Market Research Future

- To provide country level analysis of the market for segments by type, by application, by end users and its sub-segments.
- To provide overview of key players and their strategic profiling in the market, comprehensively analyzing their core competencies, and drawing a competitive landscape for the market
- To track and analyze competitive developments such as joint ventures, strategic alliances, mergers and acquisitions, new product developments, and research and developments in the global Micro-pump market.

Market Synopsis of Micro-pump Market:

Market Scenario:

Micro-pumps are essential components to controlling and modulating fluidic flow in microfluidic networks. They are responsible for generating temporal and volumetric fluid movement on-chip and are used to reduce the amount of external hardware necessary to operate a microfluidic device. They are used to move a liquid or gas (fluid) from one location to another. Inkjet printers, blood analyzers, and implantable insulin delivery systems are a few examples of where micro-pumps are currently used. Micro-pumps are being developed due to their reduced dimensions and can be used in vivo or internal to the pump. They also have the ability to handle extremely small volumes of liquid very efficiently.

Market for Micro-pump is booming due to increasing medical device miniaturization the pump manufacturers are shrinking their designs, leading to growing interest in micro-pumps. The global market for Micro-pumps is expected to reach US\$ XX by the end of the forecasted period and is expected to grow at a CAGR of XX%

Taste the market data and market information presented through more than 50 market data tables and figures spread in 130 numbers of pages of the project report. Avail the in-depth table of content TOC & market synopsis on "[Global Micro-pump Market Research Report- Forecast To 2027](http://www.marketresearchfuture.com/request-toc/global-micro-pump-market-research-report-forecast-to-2027)"

Segments:

Global micro-pumps market has been segmented on the basis of types which comprises of Mechanical, Non-Mechanical and others. On the basis of application, market is classified into drug delivery, biomedical, infusion and others. On the basis of end users, market is segmented into Hospitals, Clinics, Diagnostic centers and others.

Regional Analysis of Micro-pump Market:

Globally North America is the largest market for Micro-pump. The North American market for Micro-pump is expected to grow at a CAGR of XX% and is expected to reach at US\$ XXX Million by the end of the forecasted period. This is because of investment feasibility, development trends in North American countries. Europe is expected to be the second-largest market for Micro-pump which is expected to grow at a CAGR of XX%

Key Players for Micro-pump Market:

Some of the key players in this market are: IDEX Corporation (US), Xavitech, Alldoo Micropump (China), Servoflo Corporation, Bio-Chem Fluidics, TOPS Industry & Technology Co. Ltd. and others.
