

Pesticides: Consumption, Demand, Sales, Competitor and Forecast 2016 – 2021

Pesticides Global Market 2016 Analysis and Forecast to 2021

PUNE, INDIA, October 19, 2016

/EINPresswire.com/ -- Pesticides are substances meant for attracting, seducing, and then destroying any pest. They are a class of biocide. The most common use of pesticides is as plant protection products (also known as crop protection products), which in general protect plants from damaging influences such as weeds, fungi, or insects. This use of pesticides is so common that the term pesticide is often treated as synonymous with plant protection product, although it is in fact a broader term, as pesticides are also used for non-agricultural purposes. Garden Pesticides are substances meant for attracting, seducing, and then destroying any pest in the garden, which in general protect plants from damaging influences such as weeds, fungi, or insects. Garden pesticides include herbicides (which kill plants), insecticides (which kill insects), fungicides (which kill fungi) and other pesticides.
