

Internet Security Global Market Analysis By Application, Technology, Geography Forecast to 2020

Internet threats have evolved as a global problem and have spread across various geographies. .

PUNE, INDIA, October 19, 2016 /EINPresswire.com/ -- [World Internet Security Market](#)

Internet threats have evolved as a global problem and have spread across various geographies. The main objective of Internet security solutions is to protect the systems and networks against cyber-attacks. Increasing number of advanced network threats, such as virus, spam, malware, and others, have led the Internet security solution providers to develop advanced products. Increasing usage of Internet across every sector has increased the vulnerability of virus attacks, spams and others, which could severely impact system functionality and business operations. Several sectors, such as finance, infrastructure, transportation, telecommunication, and defense and research institutes, have become the prime targets of the cyber-attacks.

Internet security solutions protect computing systems to ensure flawless execution of operations and prevent damage and loss that might arise from any kind of cyber-attack. This report presents a detailed view on the world Internet security market. The market growth is driven by several factors, such as cloud-based business operations, increase in the number of online financial transactions, and growing use of Internet due to wireless availability and enhanced connectivity. The presence of pirated software and lack of awareness about utilizing Internet security features among the consumers, act as the key restraining factors. However, the market is expected to witness constant growth with increasing number of Internet applications, such as e-commerce and e-governance and growing awareness and for efficient security solutions. Additionally, increasing adoption of managed security solutions offered by various companies would foster the growth of Internet security market. The major companies operating in this market include IBM, Intel, Symantec, and HP among others. These top players have primarily adopted product launch, product enhancement, and acquisition strategies in order to enhance their market share in world Internet security market.

INTERNET SECURITY MARKET KEY SEGMENTS

The world Internet security market is segmented into product & services, technology, application, and geography.

Market by Product & Service

Hardware

Software

Services

Market by Technology

Authentication technology

Access control technology

Content filtering

Cryptography

Market by Application

BFSI

Retail

Telecom & IT

Government

Manufacturing

Education

Aerospace, defense, & intelligence

Others

Market by Geography

North America

Europe

Asia-Pacific

LAMEA (Latin America, Middle East and Africa)

Key Players

International Business Machine (IBM) Corporation

Hewlett Packard (HP) Company

Microsoft Corporation

CISCO Systems, Inc.

Google Incorporation

Intel Corporation (McAfee, Inc.)

Symantec Corporation

Trend Micro

Kaspersky Lab

Dell (SonicWall, Inc.)
