

Communications Hardware Becoming Faster, Smarter and Lighter

LONDON, GREATER LONDON, UNITED KINGDOM, November 22, 2016 /EINPresswire.com/ -- In today's dynamic business environment, the main form of communication for any individual is through their mobile phones. Mobile phones are used for more than just talking. They can be used for checking emails, texting, taking photographs, delivering presentations, transferring files and video conferencing. People now depend on their mobiles much more than they did earlier

Communications hardware manufacturers are now developing hybrid equipment to cater to customers that need equipment for multiple usage. The emergence of hybrid equipment has created scope for new products and for a wide range of operations. Land mobile radio (LMR) and Long Term Evolution (LTE) technology along with Push to talk (PTT) apps on smartphones, tablets and WiFi only devices enabled communications hardware equipment to offer products for industrial use, dual or triple band radios with inbuilt LTE phones. Therefore, users can switch between LMR, LTE or WiFi channels depending on user's requirements.

Businesses in the [communications hardware industry](#) manufacture telephone apparatus and broadcasting and wireless communications hardware. It includes wired and wireless communication hardware equipment.

The Communications Hardware market is relatively concentrated, with a number of large, global players. The top competitors like Apple, Samsung, CISCO, Huawei and Qualcomm have their own hybrid equipment which helps in the manufacturing of smart phones with new features.

According to The Business Research Company's Technology analyst, Mr. Ramesh, there is a positive growth for the communications hardware market due to the increasing penetration of smartphones. The Business Research Company estimates that the communications hardware market will grow to \$527 billion in 2019 due to the increasing penetration of smartphones, laptops and tablets. The Americas was the largest geographic market in the communications hardware market in 2015, accounting for \$226 billion or 47.8% of the global market.

Billion

The Business Research Company Report's Coverage:-

- _ MARKETS COVERED:- Computer Facilities Management, Computer Systems Design Services, Software Services, Data Processing and Hosting.
- _ COMPANIES MENTIONED:- Telecom, IT Services, Software Products, Computer Hardware.
- _ COUNTRIES:- Australia, Brazil, China, France, Germany, India, Italy, Japan, Spain, Russia, UK, USA.
- _ REGIONS:- Asia, Americas, Europe, Middle East & Africa, Oceania.
- _ TIME SERIES:- Five years historic and forecast.
- _ DATA SEGMENTATIONS:- Country and regional splits, market share of competitors, market segments.
- _ AND MORE:- Please Visit tbrc.info

Key Points of the Information Technology Report:

1. Market Characteristics.
2. Historic Data.
3. Forecast Data.
4. Mergers and Acquisitions in the market.
5. The latest trends in the market.
