Description

WiseGuyReports.Com adds" Data Center Rack PDU Market in the US 2015-2019 "Research To Its Database.

In a data center environment, a rack PDU device is used to supply electrical power into a server rack. The rack PDUs can also assist in monitoring functionality and performing remote access. They are placed in a vertical or horizontal position. Rack-mounted PDUs are manufactured in different sizes and configured depending on the type of connection and voltage. PDUs can be classified into simple and inexpensive rack-mounted power strips based on functionalities that include power filtering, remote monitoring, control by LAN or SNMP, and intelligent load balancing. They can be easily installed, configured, and managed, and play the role of supplying AC power to IT equipment within the racks.
