

Global Cloud Billing Market 2017-Industry Analysis, Size, Share, Growth, Trends and Forecast by 2022

WiseGuyReports.com adds "Cloud Billing Market 2017 Global Analysis, Growth, Trends and Opportunities Research Report Forecasting to 2022" reports to its database

PUNE, INDIA, October 13, 2017 /EINPresswire.com/ -- Cloud Billing Market:

Executive Summary

Cloud billing can be defined as the process of generating bills from the resource usage data with the help of predefined data sets and billing policies. While using cloud billing, a user defines a cloud billing service module enabled for a service oriented architecture, covering both functional requirements, a quote service, conversion functions and policies, payment schemes, and user identification and the non-functional, but important requirements such as security, scalability, standards, and fault tolerance. The cloud billing systems enables users to easily manage and retrieve data from various locations and, also helps in serving their customers in a better manner. Globally, a shifting focus from the product centric approach to the customer centric approach is expected to remain the key growth driver during the period of study

Geographically, North America dominated the cloud billing market driven by higher demand and consumption of advanced technologies in various retailing functions such as retailing and higher awareness and usage rate of newer technologies in business practices. North America was followed by Europe and Asia-Pacific as second and third largest market for the cloud billing market. Asia Pacific is projected to have the fastest growth, owing to a rapidly developing retail business network and growing technological adoption in business practices in major developing nations such as China and India in this region.
