

IT Governance Launches New Range of Products to Help Organisations Deliver An Effective Cyber Security Strategy

IT Governance has announced the release of two new products to help organisations define and deliver an effective cyber security strategy.

BOISE, IDAHO, UNITED STATES, July 25, 2013 /EINPresswire.com/ -- [IT Governance](#) USA – the specialist provider of IT governance, risk and compliance products and services, has announced the release of two new products to help organisations define and deliver an effective cyber security strategy:

The [Cyber Security Governance](#) & Risk Management Toolkit – this new toolkit make an enormous leap forward by consolidating the guidance of five separate approaches – PAS 555, ISO27032, The Cloud Controls Matrix, Ten Steps to Cyber Security & ISO27001 - into one single, robust framework.

The Managing [Cyber Security Risk Training](#) Course – this new course provides the skills and knowledge to develop and deploy an effective cyber security risk management strategy. Successful delegates will be awarded with the world's first accredited cyber security risk qualification.

Alan Calder CEO of IT Governance comments: "Being a market leader in the governance, risk and compliance industry means we're constantly looking to develop new products that help our clients meet their cyber security needs. Everyone organisation now accepts that cyber security is an issue that must be addressed and we want to help ensure they have an effective and robust cyber security strategy in place. Based upon all the latest industry standards, research and best practice, these two new, complimentary, products have been designed to deliver a complete overarching strategy towards cyber strategy."

You can learn more about both these products on the IT Governance North American website:
