

Advanced Dental Care Now Offering Dental Lasers in Cranberry Township, PA

CRANBERRY TOWNSHIP, PA, USA, July 22, 2013 /EINPresswire.com/ -- Advanced Dental Care in Cranberry Township, Pennsylvania, recently added dental lasers as a powerful tool used for treatments and procedures. The dental practice is proud to combine the latest technology with 30 years of experience for the benefit of its patients.

At Advanced Dental Care in Cranberry Township, dental lasers are a powerful tool used for treatments and procedures. The dental practice takes great pride in combining the latest in technology with 30 years of experience for the benefit of its patients.

Advanced Dental Care now practices [Cranberry Township laser dentistry](#) for the treatment of tooth decay and gum disease, and for biopsies and the removal of lesions, as the focused light beam cuts away infected tissue.

[Cranberry Township dental lasers](#) are also beneficial for cosmetic applications for patients during tooth whitening and shaping procedures. Dental lasers act as catalysts to boost the effectiveness of bleaching agents, thereby speeding up the whitening process. With tooth shaping, laser dentistry cuts precisely and accurately.

Dr. Edward R. Robison, [laser dentist in Cranberry Township](#), says, "An added benefit of laser dentistry is that it actually reduces the risk of infection because light from the laser sterilizes the area of the tooth or gum undergoing treatment." He adds that dental lasers not only improve a wide variety of treatments, but they also reduce the time it takes for those procedures to take effect.
