The Global [Aviation Fuel Additives](#) Market is accounted for \$604.49 million in 2015 and is expected to reach \$970 million by 2022 growing at a CAGR of 6.9% during the forecast period. Growing demand for clean & efficient fuel, stringent environmental regulations and growth in automotive industry are the major factors fueling the market growth. On the other hand, rise in demand for alternate fuels and vast investments in R&D and technology are inhibiting the market. Rise in demand for Ultra-Low-Sulfur Diesel (ULSD) is the major opportunity for vendors in aviation fuel additives. The demand for fuel additives in Asia-Pacific is anticipated to increase at the back drop of high performance fuels for automobiles.
