The analysts forecast the global flex fuel engines market to grow at a CAGR of 3.08% during the period 2016-2020.

Flex-fuel vehicles are segmented in terms of engine capacity such as compact-, mid-size, and full-size. In Brazil, there is a high penetration of compact-size engines in vehicles with approximately 70% market share, while in the US, there is a higher market share for full-size vehicles. However, apart from Brazil and the US, there is a very low penetration of flex-fuel vehicles in other parts of the world. China has flex-fuels vehicles running on methanol (M85), which are very less in number, while European countries such as Sweden and Finland have a marginal market share when it comes to flex-fuel engines.
