PUNE, INDIA, January 11, 2017 / EINPresswire.com/ --

Summary

The Global Enterprise Mobility market is estimated to be \$6.6 billion in 2014 and is expected to reach \$11.2 billion growing at a CAGR of 6.83% during the forecast period 2014 to 2022. The growing cellular subscriber base and enhanced telecommunication infrastructure in terms of robustness, providing consistent connectivity anytime and anywhere, and on the whole increase in network coverage are the major drivers for the Enterprise Mobility market. The budding acceptance from large and small & medium businesses, and beginning of sophisticated mobile devices such as smart phones, PDA's, and hand held devices are other driving factors that will stimulate the enterprise mobility market in the coming years. The major restraints in this market are the management and fulfillment issues and security risks associated with use of personal devices.
