

Facial Injectable Market : Global key Players, Trend, Segmentation, Applications, Analysis and Forecast 2021

The global facial injectable market is expected to reach USD 9.0 billion by 2021, growing at 13.2% CAGR during the forecast period.

PUNE, INDIA, January 13, 2017 /EINPresswire.com/ -- [Facial Injectable](#) Market:

Summary:

Facial Injectable products, also known as dermal fillers are products that help in trending applications such as bioengineering or facial rejuvenation. With age, facial skin is bound to lose subcutaneous fat naturally and the skin is lured closer to the facial working muscles, thereby making smile lines and wrinkles over the face, more visible.

This also leads to stretching of facial skin which adds to the loss of volume. These issues can be solved with the use facial injectable or dermal fillers. These products may also be used in treating early signs of ageing or as a value addition to a facial rejuvenation surgery.

The global facial injectable market is expected to reach USD 9.0 billion by 2021, growing at 13.2% CAGR during the forecast period.

On the basis of type, the global facial injectable market is segmented into botulinum toxin, hyaluronic acid, polymers & particles, and collagen. Botulinum toxin segment is estimated to hold the largest share within the global facial injectable market in 2016.
