Market Research Analysis:

Among all types of excavators, mini/compact excavators are expected to grow rapidly. Due to their small size they are known as mini excavators. Mini excavators weigh from 0.7 tons to 8.5 tons and consist of boom swing and backfill blade. The growth of this segment is attributed to the increasing demand for technologically advanced and fuel-efficient excavators. The crawler excavators segment is also expected to grow significantly during the forecast period. They are a crawler digging machine which are designed to dig or move large objects.

Asia Pacific is the largest and fastest growing market for the excavators. The developing nations such as China and India contribute maximum to the growth of this region owing to the recent technological developments, an increasing number of power projects, substantial growth in the construction of dams and canals and significant growth in the construction industry. In North America and Europe region the growth of the excavators market is attributed to significant infrastructure development in the region.
