Market Forecast

The Global Gum Arabic Market is mainly driven by increasing application of gum arabic in various food products as an emulsifier, binding and thickening agent. Growing demand of gum arabic from manufacturers of personal care and cosmetics made is supporting the market growth. Gum arabic helps to improve digestion, immune system and useful to control the blood sugar

which is boosting gum arabic application in pharmaceuticals from last few years. These factors will play a key role in the growth of gum arabic market at the CAGR of 5.6% during 2017-2023.

Downstream analysis:

Gum arabic is used in various products ranging from ink to ice cream as an emulsifier, thickening agent, fat replacer and stabilizer. In pharmaceutical especially in herbal medicines, the gum is used to bind pills and lozenges and to stabilize emulsions. It is also used to produce a medium for applying essential oils, balsams, resins, camphor, and musk. Gum arabic is used as a binder for watercolor painting because it dissolves easily in water and it is also used in printmaking to protect and etch an image. Some firework manufacturers use gum arabic as a binder in firework composition as it is soluble in water.
