## [Drones Market 2017](#)

### Executive Summary

Drones are the front-end video surveillance system products which are gaining popularity and playing their part in driving the global video surveillance system market. Drones market is currently at the nascent stage but is anticipated to rise in the next five years i.e. 2016-2020 tremendously at a significant CAGR. The market is largely governed by the military drones but civil drones are also gaining momentum and driving the market in the positive direction. The upsurge in the civil drones market is due to the increased need for video surveillance at various places as crime rate is increasing over the period.

The major growth drivers for the drone market are: technological innovation, rise in civil drones market, persistent intelligence, surveillance & reconnaissance and internal & external safety threats. Despite the market is governed by various growth drivers, there are certain challenges faced by the market such as legal and regulatory policies & procedures, negative environmental impact, privacy issues, high cost, spectrum allocation and UAS integration in the national airspace.
