PUNE, INDIA, June 20, 2017 /EINPresswire.com/
--

The analysts forecast the [global reach stacker market](#) to grow at a CAGR of 4.58% during the period 2017-2021.

Port material handling equipment is used to maintain port activity, which includes bulk material loading and unloading, packaging, and dispatching. A reach stacker is primarily used for handling intermodal cargo containers in small, medium-sized, and large terminal ports. It is a vehicle that can quickly transport containers over short distances within the port and pile them in various rows depending on its level of access.
