[Surfactants Market 2017](#)

Surfactants are materials or substances with low interfacial tension or surface tension. Surfactants work based on the principle of adsorption at the interface or surface of the two-phase systems between a liquid and a solid or between two liquids. When adsorption takes place at the surface or interface, the region with high affinity aligns itself toward the volume phase and the region with less affinity aligns itself to the bulk phase and protrudes from the interface.

The analysts forecast the global surfactants market to grow at a CAGR of 5.24% during the period 2017-2021.
