Europe was the Largest Regional Biopower Market in the World in 2016

Europe is the largest biopower market in the world. It accounts for 37.4% share of the global cumulative biopower installed capacity. Asia-Pacific is the second-largest region with a share of 30.25% by 2016. It is followed by North America (NA), South and Central America (SCA), and Middle East and Africa (MEA).

## Agriculture Waste and Municipal Solid Waste were the Major Feedstocks for Biopower Generation in 2016

Agricultural waste and municipal solid waste were the major feedstocks used for powering biopower plants in 2016. Nearly 32% of the total biopower plants installed used agricultural waste as the main input, whereas 23% used municipal waste and 16% used wood byproducts for producing electricity. Most biopower installations took place in Asia-Pacific with total capacity of 149.7 megawatts (MW) followed by Europe with 108.9MW.
