

CAOMM wins substantial concrete mattress scope

Control & Applications Offshore Marine Management (CAOMM) for the installation of 12,000 concrete mattresses utilising a multi mattress deployment system, MDS3

ABU DHABI, UNITED ARAB EMIRATES, January 17, 2019 /EINPresswire.com/ -- Leading offshore services provider, [Control & Applications Offshore Marine Management](#) (CAOMM), has signed a contract with ULO Systems for the installation of 12,000 concrete mattresses utilising sister company Offshore Marine Management's (OMM) Multi Mattress Deployment System, MDS3.

The contract, due to be delivered in Q1 2019, covers the installation of 12,000 concrete mattresses, manufactured by ULO themselves, to minimise erosion by protecting a river bank on-site at a Nuclear Plant in a rural area of Bangladesh. The supply of the MDS3 system will be supported by specialist personnel provided by sister company, Offshore Marine People & Academy (OMPA).

The MDS3 system most recently completed a mattress installation to protect subsea cable on the Scilly Isle connector project off the coast of the United Kingdom. The use of the MDS3 on these two projects shows the capability and versatility of the system on a wide range of projects and environments, whilst remaining a cost effective solution.

“

This latest award from ULO further demonstrates the capability of both the CAOMM team and the MDS3 tool to adapt to their service offering to the given situation in a tough environment.”

Rob Grimmond

Rob Grimmond, Managing Director for CAOMM, said of the agreement, “We are pleased to support this exciting project providing the opportunity to expand into a new part of the world.

This latest award from ULO further demonstrates the capability of both the CAOMM team and the MDS3 tool to adapt to their service offering to the given situation in a

tough environment.”

Colin Reilly, Deputy General Manager at ULO Systems, commented “For ULO, when requested to undertake the installation scope from our client we only ever considered using CAOMM. The MDS tool is without doubt an incredible asset and will assist in achieving our installation target

but what's a bigger asset is the people of CAOMM. Their business ethos is exactly same as on own. Rob has a fantastic team supporting him, the attention to detail and commitment to making the project successful has been refreshing. 2019 will be a great year for our team in Bangladesh! "
