PUNE, MAHARASHTRA, INDIA, May 14, 2019 /EINPresswire.com/ -- [Global Human Albumin market 2018-2025](#)

Albumin-based therapies such as Idelvion (CSL654 rIX-FP) by CSL Behring received marketing approval from the US FDA in March 2016 and from the EMA in May 2016. Apart from these, Albutropin (TV-1106) by Teva Pharmaceuticals, Ampion by Ampio Pharmaceuticals, and Albutein by Grifols (for Alzheimer's disease) are expected to enter the market during the forecast period.

Human albumin was initially used only as a volume replacement therapy; however, extensive research has shown that human albumin has numerous applications in other therapeutic areas as well. For instance, Grifols is exploring the use of the product to stabilize Alzheimer's disease. Moreover, drugs containing human serum albumin, such as Levemir and Abraxane are used to treat diabetes and metastatic breast cancer, respectively. Furthermore, the on-going research and augmented adoption of albumin in the new therapeutic areas will boost this market's growth during the predicted period.

The APAC region dominated the global human albumin market and accounted for most of the market share during 2017. China was the highest revenue contributor because of the increased demand for albumin. A rising patient population and easy availability of drugs will aid in the growth of this market. Moreover, the increased awareness about the therapeutic potential of immunoglobulins is expected to affect the growth of this market in APAC.

In 2018, the global Human Albumin market size was xx million US\$ and it is expected to reach xx million US\$ by the end of 2025, with a CAGR of xx% during 2018-2025.
