Description:

Blockchain is currently one of the most talked-about technologies. Across industries, organizations are exploring blockchain's potential impact in their space and how they can benefit from this emerging technology. The communications service provider (CSP) industry is no exception.

The modularity provided by smart contracts enables various aspects of CSPs' operations to be streamlined, including billing, roaming, wholesale, NFV management and supply chain management. In the context of roaming, blockchain's benefits include faster identification of visiting subscribers, prevention of fraudulent traffic and claims reduction. In addition, the elimination of clearing houses could lead to significant cost reduction.

In 2018, the global Blockchain in Telecom market size was xx million US\$ and it is expected to reach xx million US\$ by the end of 2025, with a CAGR of xx% during 2019-2025.
