

The Preview Channel™ the Fastest Growing Channel Now in 60 Million + Homes to Release New Mobile TV App.

Short Snackable Entertainment Content on Your Mobile Phone

NEW YORK CITY, NY, UNITED STATES, July 25, 2019 /EINPresswire.com/ -- [The Preview Channel™](#) (TPC) will introduce a new video streaming app by the end of 2019 which will offer morning and evening original blocks of short form programming centered on movie and video game trailers featuring top box office stars and blockbuster franchises.

The trailers and thematic blocks of movie and videogame related content will run between two and six minutes in length and air seven days a week. The application will be algorithmically compiled by its partner, [XUMO TV](#). It will be ad-supported and 100% free to consumers.

"We are excited to be able to offer our mobile consumers access to popular new and archival movie and video game content in an on-demand, easily digestible format on their portable devices," said William Sager, The Preview Channel™'s founder and CEO. The Preview Channel has a library of over 200,000 trailers and short form programs including the highly sought after and compelling behind-the-scenes Hollywood footage.

The Preview Channel™, which reaches over 60 million viewers across its multiple platforms, expects the App to particularly be favored by millennials. Research firm EMarketer estimates that 94% of millennials are smartphone users, a key demographic.

Traditional networks have increasingly sought new ways to reach audiences as the amount of time spent on mobile devices, including smartphones, outpaces time dedicated to consuming conventional TV.

According to EMarketer, adults in the United States will spend an average of three hours and 43 minutes each day on their smartphones, feature phones and tablets this year; eight more minutes than they'll spend watching TV. "Millennials are hungry for smart, fun content that's relevant to them – and movies and video games couldn't be more culturally on point," said Sager. "With The Preview Channel™ we'll be able to meet that demand in a new style and format that works for them."

The Preview Channel™

We are excited to be able to offer our mobile consumers access to popular new and archival movie and video game content in an on-demand, easily digestible format on their portable devices”
