

# Global PE Pipes Market 2019 Key Players, Share, Trends, Sales, Segmentation and Forecast to 2025

*WiseGuyReports.com Presents "Global PE Pipes Market Research Report 2019"  
New Document to its Studies Database*

PUNE, INDIA, October 4, 2019

/EINPresswire.com/ --

Pipes that are made from polyethylene and can be used for gas and fluid transfer are called [PE pipes](#). These pipes have a strong molecular bond as well as a high level of impermeability which contributes to their use, especially in high-pressure pipelines. The properties of polyethylene which gives it resistance to chemicals as well as being extremely tough along with its low weight and resistance to corrosion have made its use in situations where durable and cost-effective gas and fluid piping systems are required to grow.

The plastic polyethylene has changed the low-pressure pipe system design globally due to its unique combination of properties. These properties make it ideal to be used in water and gas distribution systems and have a record of being reliable as well as economical. They have a low material cost with a lightweight design that makes transport and handling of the pipes easy. They are biologically inert as well as being resistant to various chemicals as well as corrosion. They are also eco-friendly as the pipes are recyclable.

The report published on the global PE pipes market focuses on the volume as well as the value of PE pipes at all three levels namely the global level, regional level, and the company level. The future trends of the market, distributors, sales channels, risks and entry barriers along with the growth rate and the current market status are comprehensively analyzed. The market share, price, value and the production of various top manufacturers in the PE pipes field are focused on.

## Key Players

JM Eagle  
Chevron Phillips Chemical Company  
Aliaxis  
WL Plastics  
Jain Irrigation Systems  
Pipelife International  
Nandi Group  
Blue Diamond Industries

## Market segmentation

The global PE pipes market can be split into different segments on the basis of the type of pipe being used as well as the various applications that the PE pipes can be used for.

### Market segment based on type:

PE80 pipe: The MRS (minimum required strength) of PE80 pipes should not be less than 8.0 megapascals.

PE100 pipe: The MRS (minimum required strength) of PE80 pipes should not be less than 10.0 megapascals.

Market segment based on the application: Depending on the application that PE pipes are used for they can be classified into:

Water Supply  
Oil and Gas  
Sewage Systems  
Agricultural Applications  
Others

## Regional overview

Regionally the report published on the global PE pipes market focuses on several key regions around the world that includes Japan, China, Europe, and North America among others. It focuses on sales value as well as the volume from three important perspectives. From the global perspective, the PE pipes market size is presented after analyzing the historical data as well as future prospects. Regionally the report is focused on key regions around the world. The market share, revenue, ex-factory price and the production capacity of the top manufacturers covered in the report are presented comprehensively. The value and the volume of various submarkets with respect to both the region and the country are presented.

## Industry news

Plastics Industry Pipe Association recently asked environmentalists about their growing concern regarding plastic waste. The association's Executive General Manager Rodger Connolly revealed that while the concern related to plastic waste can't be ignored, yearly 2,000 tonnes of PE pipe is being recovered and recycled into non-potable pipes. The association also highlighted the

benefits of PE pipes over metallic pipes and other alternatives.

#### Table Of Contents:

- 1 Report Overview
- 2 Global Growth Trends
- 3 Market Share by Key Players
- 4 Breakdown Data by Type and Application
- 5 United States
- 6 Europe
- 7 China
- 8 Japan
- 9 Southeast Asia
- 10 India
- 11 Central & South America
- 12 International Players Profiles
- 13 Market Forecast 2019-2025
- 14 Analyst's Viewpoints/Conclusions
