

# Private LTE Network 2019 Global Trends, Market Size, Share, Status, SWOT Analysis and Forecast to 2025

*WiseGuyReports.com Presents "Global Private LTE Network Market Size, Status and Forecast 2025" New Document to its Studies Database*

PUNE, INDIA, October 7, 2019  
/EINPresswire.com/ --

Long-Term Evolution (LTE) is a wireless broadband communication standard specified for data terminals and devices with internet connectivity. It is based on older technologies such as UMTS/HSPA and GSM/EDGE. It increases the capacity and network speed by using a different radio interface along with core network improvements. It is also commonly referred to as 3.95G. LTE is a registered trademark owned by ETSI (European Telecommunications Standards Institute). [Private LTE network](#) is essentially a standards-based LTE network designed for specific enterprise business, government or educational purposes and services.

The definition of a private LTE network, or a local LTE network, is a network that utilizes dedicated radio equipment to serve a basic objective with specific IoT applications and services. To make the network independent of traffic fluctuation in the wide-area macro network, it makes use of dedicated equipment. Private LTE networks can be tailored for low latency and more optimized performance. It is a dedicated network for consumers, businesses and the field of internet of things (IoT). Private LTE can be based on a licensed, unlicensed or shared spectrum based on the service provider.

The global private LTE network market report gives an overview regarding the industry, market size, and status. The report analysis includes the development status and forecasts for each of the segments and the key regions. The data used in this report are from the years 2013 to 2018. With 2019 as the estimated year, it provides the market estimates up to 2025. Giving a complete profile on each of the key players, it also gives insights into the competition, market concentration, and the product specifications. The new entrants and upcoming technological trends have also been covered by this report.

## Key Players

Nokia  
Huawei  
Alphabet  
Qualcomm

## Market Segmentation

The market segmentation for the global Private LTE network market can be split on the basis of the product type and the various applications that each product can be used for. Segmentation on product type would split the market broadly into Fixable LTE and Deployable LTE solutions. Deployable LTE solutions include a completely portable system that can be set up anywhere to provide network coverage and connectivity. Fixable solutions refer to the immobile infrastructure. Based on the product application the market split would be into Public Safety, Military, Energy & Utilities, Transportation, Hospital, and others. The market factors such as technological shifts and substitutes which affect these segments have been studied.

## Regional Analysis

The region-wise product and services demand, with the major players, prices and the regional supply, based on the collected data are presented in the geographical segmentation. The key regions and countries covered by the global private LTE network report are the United States, EU, Japan, China, India, and Southeast Asia. the market share of the major companies and service providers in each of these regions with their production volume and revenue have been illustrated in this report. The current market size and outlook, along with the development trends and strategies have also been taken into consideration. The government policies, technological threats, and emerging markets are the other major factors the report covers.

## Industry News

A trial private LTE network constructed in Golden, Colorado, by the National Renewable Energy Lab's successfully demonstrated the reliability for distributed renewable energy generation systems such as solar and wind energy using private LTE communications. The test network uses the 900 MHz spectrum held by Anterix, formerly pdvWireless. The project could effectively transmit control information without any interruption or lag, regardless of conditions such as network congestion.

## Table Of Contents:

1 Report Overview

2 Global Growth Trends

- 3 Market Share by Key Players
- 4 Breakdown Data by Type and Application
- 5 United States
- 6 Europe
- 7 China
- 8 Japan
- 9 Southeast Asia
- 10 India
- 11 Central & South America
- 12 International Players Profiles
- 13 Market Forecast 2019-2025
- 14 Analyst's Viewpoints/Conclusions
