COVID-19, the disease it causes, surfaced in late 2019, and now had become a full-blown crisis worldwide. Over fifty key countries had declared a national emergency to combat coronavirus. With cases spreading, and the epicentre of the outbreak shifting to Europe, North America, India and Latin America, life in these regions has been upended the way it had been in Asia earlier in the developing crisis. As the coronavirus pandemic has worsened, the entertainment industry has been upended along with most every other facet of life. As experts work toward a better understanding, the world shudders in fear of the unknown, a worry that has rocked global financial markets, leading to daily volatility in the U.S. stock markets.

Jelly, jam and preserves are all made from fruit mixed with sugar and pectin. The difference between them comes in the form that the fruit takes. In jelly, the fruit comes in the form of fruit juice. In jam, the fruit comes in the form of fruit pulp or crushed fruit (and is less stiff than jelly as a result). In preserves, the fruit comes in the form of chunks in a syrup or a jam.

Many varieties of fruit preserves are made globally, including sweet fruit preserves, such as those made from strawberry or apricot, and savory preserves, such as those made from tomatoes or squash. The ingredients used and how they are prepared determine the type of preserves; jams, jellies.
