

Worship Summit Live 4 to Teach Virtual Church Production and Live Streaming Technologies

Houses of Worship will learn the latest methods for live streaming their holiday worship services while many congregations remain socially distanced

WEST CHESTER, PA, UNITED STATES,
October 15, 2020 /EINPresswire.com/ --

After three successful educational sessions this year, Worship Summit Live is back in time for houses of worship to acquire critical technical training for a busy upcoming holiday worship season. On Wed, Nov. 18, 2020, the Worship Summit Live 4 virtual event will host church production and technology experts who will demonstrate the best methods to safely produce engaging worship celebrations for virtual congregations. Attendees can view technical sessions at Worship Summit Live for free, as well as access a separate networking and collaboration meeting via Zoom for only \$5.

Since earlier this year when the COVID-19 pandemic forced millions to socially distance, houses of worship have sought ways to meet the spiritual needs of their congregations. This extremely popular event will provide worship leaders, musicians, volunteers, and administrators with practical tools they need to create high-quality live productions or video recordings of spiritual services. Based on survey results from July's Worship Summit Live, the half-day event format will focus intently on technical topics, including deep dives into two popular video production platforms: OBS and vMix. Attendees will also see worship streaming tips from well-known worship pastor Jake Gosselin, as well as tours of technology setups currently working in several houses of worship. Skills taught during [Worship Summit Live 4 should continue to guide technology leaders](#) whether worship gatherings are remote, in-person, or exist in a hybrid format.

For houses of worship interested in being featured in Worship Summit Live, they can submit a behind-the-scenes tech tour video showing their house of worship's setup. Five winners will be chosen, and each will receive \$150. Winners and everyone who submits a video will get free tickets to the Zoom portion of the event for their entire congregation. [PTZOptics](#), a manufacturer of robotic pan, tilt, zoom camera solutions for a variety of broadcast and live streaming applications, is hosting Worship Summit Live 4. The half-day schedule is available at: worshipsummit.live. The live stream is free, and anyone interested in networking within the collaborative Zoom meeting can purchase a pass at <https://www.eventbrite.com/e/worship-summit-live-4-technical-training-event-tickets-121037567623>. PTZOptics is the sister-company to HuddleCamHD, manufacturers of professional video conferencing cameras.

About Worship Summit Live

Worship Summit Live is now a quarterly event and is the only professional development event specifically aimed to educate House of Worship (HoW) professionals on church production and livestream services to their congregations. Developed by PTZOptics, the livestreamed all-virtual event is for worship and communication leaders looking to leverage the latest communications tools and technology to communicate with worshipers. Seasoned HoW professionals and those just dipping their toes into online worship will gain advice, tips, tricks, and thoughtful guidance on how to safely address and engage their congregations in today's world.
