

The TeleDentists Partners with FlexCare Digital Health to Expand Services to Employers, Brokers and Families

USA, October 13, 2020 /EINPresswire.com/ -- The [TeleDentists](#) Partners with [FlexCare](#) Digital Health to Expand Services to Employers, Brokers and Families

Today, The TeleDentists, a nationwide provider for virtual dental care, announced its partnership with FlexCare Digital Health, a leading provider of online and on-demand healthcare delivery services to private and public employers. This partnership allows FlexCare's employer groups to benefit from The TeleDentists virtual dental services. The TeleDentists and FlexCare will start their partnership immediately and continue to deliver dental access to employees and their family members.

"The TeleDentists is excited to welcome FlexCare Digital Health to the partnership family as we continue to uplift employees and their dependents with virtual Dental visits," said co-founder Dr. Maria Kunstadter.

According to a recent AMA Digital Health study, 6-7 million patients annually have an urgent oral or dental care need. It's been over 3 years since the average American has been to the dentist, partially because over 50% of Americans have no dental insurance.

With The TeleDentists and FlexCare working together, the partnership can help improve unmet needs for Dental care and improve access 24/7. This will also reduce absenteeism, increase access and avoid unnecessary ER and UC visits for Dental problems.

"FlexCare is excited to partner with The TeleDentists in providing virtual dental services to the employer market. We view this as a tremendous opportunity to provide a valuable benefit to employers and their employees" said Lee Shoemake, Principal of FlexCare.

About FlexCare

FlexCare Digital Health is a leading provider of online and on-demand healthcare delivery services to private and public employers, associations, brokers, school systems and more. By using Digital Health services instead of more expensive urgent care and ER visits, FlexCare cuts unnecessary costs and keeps members smiling (instead of waiting).

In addition to TeleDentistry, FlexCare also offers Telemedicine, Caregiver/Companionship, Dermatology, Behavioral Health, Telespine and other digital health services.

About The TeleDentists

The TeleDentists offer "the first of its kind" virtual dental service. A national network of licensed dentists utilizes a variety of virtual tools (smart phones, tablets, laptops) to assist in remediating, e-prescribing, and, when needed, arranging local dental appointments the next business day.

The TeleDentists aim to be everywhere a patient is in need of dental support including emergency rooms, clinics, long-term care facilities and to consumers through their website.
