

Diagnostic Imaging Equipment Industry Players Use Innovative Portable Equipment To Gain Competitive Advantage

The Business Research Company's Diagnostic Imaging Equipment Global Market Report 2021- COVID-19 Impact And Recovery

LONDON, GREATER LONDON, UK, October 13, 2021 /EINPresswire.com/ --

Portable diagnostic equipment is expected to be a fast-growing segment, and competitors are focusing on developing new and innovative portable equipment during the forecast period. Owing to their ease of

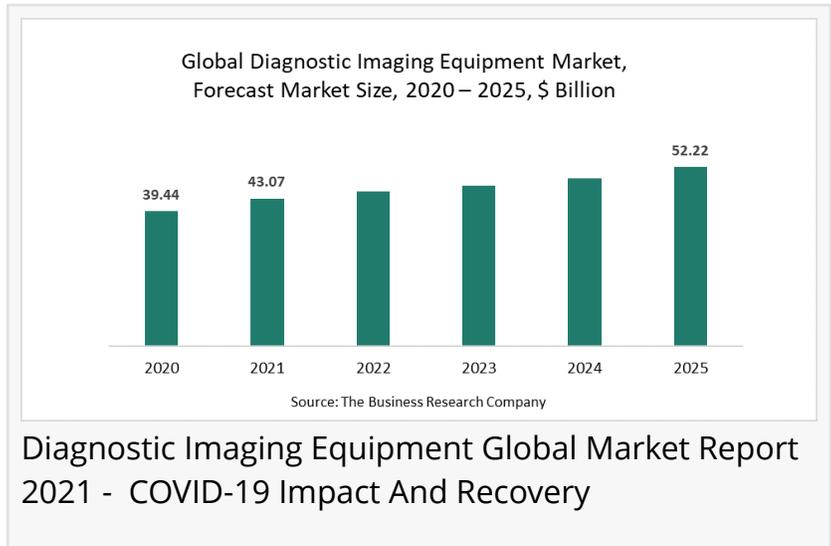

use and point-of-care applications, their adoption rates are steadily increasing not only for emergency and intensive care units in hospitals, but also as a part of homecare organizations. There is also a growing need for portable devices in the emergency care units for easy and quick usage, faster interventions for acute events, and better monitoring. Some of the well-known products include Samsung Electronics' 32-SLICE CT scanner, Brain Biosciences' CERPET portable PET scanner, Siemens Healthcare's Mobilett mira max portable X-ray systems and Sonosite's MicroMaxx portable ultrasound system.

The [global diagnostic imaging equipment market size](#) is expected to grow from \$39.44 billion in 2020 to \$43.07 billion in 2021 at a compound annual growth rate (CAGR) of 9.2%. The growth is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$52.22 billion in 2025 at a CAGR of 5%.

North America was the largest region in the global diagnostic imaging equipment market,

accounting for 45% of the market in 2020. Asia Pacific was the second largest region, accounting for 24% of the global diagnostic imaging equipment market. Africa was the smallest region in the global diagnostic imaging market.

Major players covered in the global diagnostic imaging equipment industry are Philips Healthcare, Hitachi Medical Systems, Fujifilm Holdings, Siemens Healthcare, GE Healthcare.

TBRC's global diagnostic imaging equipment market report is segmented by type into X-Ray systems devices and equipment, ultrasound systems devices and equipment, computed tomography (CT) scanners devices and equipment, magnetic resonance imaging systems devices and equipment, cardiovascular monitoring and diagnostic devices and equipment, nuclear imaging devices and equipment, by end user into hospitals and clinics, diagnostic laboratories, others, by type of expenditure into public, private, by product into instruments/equipment, disposables.

[Diagnostic Imaging Equipment Global Market Report 2021](#) - By Type (X-Ray Systems Devices And Equipment, Ultrasound Systems Devices And Equipment, Computed Tomography (CT) Scanners Devices And Equipment, Magnetic Resonance Imaging Systems Devices And Equipment, Cardiovascular Monitoring And Diagnostic Devices And Equipment, Nuclear Imaging Devices And Equipment), By End User (Hospitals And Clinics, Diagnostic Laboratories, Others), By Type of Expenditure (Public, Private), By Product (Instruments/Equipment, Disposables), COVID-19 Impact And Recovery is one of a series of new reports from The Business Research Company that provides diagnostic imaging equipment market overview, forecast diagnostic imaging equipment market size and growth for the whole market, diagnostic imaging equipment market segments, and geographies, diagnostic imaging equipment market trends, diagnostic imaging equipment market drivers, restraints, leading competitors' revenues, profiles, and market shares.
