

# Biomass Secure Power Inc. to reopen Pilot Plant in Laramie Wyoming

*Biocoal plant reopened to supply 5,000 ton samples to coal fired power plants*

CHILLIWACK, BRITISH COLUMBIA, CANADA, October 25, 2021 /EINPresswire.com/ -- Biomass Secure Power Inc. (BSP) (OTC Market Pinksheets: BMSPF). The Company plans to reopen pilot plant located at Laramie Wyoming to fulfill requests for samples requested by several power companies. BSP will supply initial test samples of 20Kg to conduct lab test. BSP will then supply 5,000 tonnes of [Biocoal](#) to five companies for test burning in power plants.

BSP is in negotiation with European and Asia companies interested in supply Biocoal under long term off-take agreements. If all supply request result in off-take agreements, it would require 1.3 million tonnes of Biocoal to fill orders.

BSP has developed a licensing program allowing companies to use our patented technology to build Biocoal plants close to power plant locations, reducing cost of Biocoal substantially. Power companies will pay an upfront fee for 25 years license and pay a royalty based on plant production. Two companies have shown interest in this program.

## About the Company

Biomass Secure Power Inc. has patented processes that manufactures Biocoal, a replacement fuel used in coal fired power plants. Biocoal reduces Co2 emissions by 96%. BSP process produces Biocoal at costs like whitewood pellets but produces 21.5Gj per tonne compared to 17.4Gj in whitewood pellets.

BSP believes climate change is the world's number one challenge and is committed to reducing Co2 entering the atmosphere and will continue research to reduce Co2 emissions.
