The delay in the construction of new offices hampers the market growth due to the COVID-19 pandemic. The temporary shutdown of smart gadgets in several nations as a result of the shutdown of factories has also influenced sales of smart doorbells. The current issue of COVID-19

has interrupted the delivery of electronics and raw materials and posed an inflationary danger to the produce. These disruptions have forced companies to de-risk while reviewing their value chains from one end to the next and implement the remote operating strategy.

The increase in home automation needs has fuelled the demand for smart devices for doorbell

cameras. Over the period, the demand for smart homes and intelligent home safety has risen. The presence and detection of an intruder are controlled with products such as infringing alarms, security cameras, intelligent door calls, and smoke detectors, utilizing motion sensors and detectors. Some manufacturers also provide quick installation and easy features. With Wi-Fi via the smartphone, the doorbell camera is connected. At present, new and technologically sophisticated items are being introduced in the worldwide doorbell camera market. The producers of doorbell camera provide a variety of product designs.

#### COVID-19 Impact Analysis:

□ Disruption in the distribution channel was a significant reason, since the manufacturing industry cannot get enough raw materials; it was not feasible to supply final items to specialized retailers. Consumers could not visit the specialist shops and the installation service could not be supported by online purchases.

□ In the pre-COVID era, the construction of properties, commercial complexes, houses, and society complexes was in full force. This factor induced the need for a doorbell camera in bulk quantities and of different shapes as required. The sales of new homes, change in lifestyle, high disposable income, rapid urbanization, and improvement in the standard of living all contribute to the growth of the doorbell camera. Following the pandemic, construction work was put on hold, obviating the need for doorbell camera for new houses. Consumers are more concerned with meeting their basic needs than with purchasing a technologically advanced doorbell camera.

The key market players profiled in the report include SkyBell Technologies, Inc., Hangzhou Hikivision Digital Technology, Co., Ltd., Vivint, Inc., VTech Communications Inc., Napco Security Technologies, Inc., United Technologies Corporation, August Home, Inc., Ding Labs Limited, Nortek Security & Control LLC, and Ifl Technology Pvt Ltd.

Geographically Analysis - North America, Europe, Asia-Pacific, and LAMEA
