Pharma Manufacturing ERP Software

The range of services offered by the company include contract manufacturing, clinical trial product manufacturing, storage, and distribution, and commercial product supply to global markets, among others. It operates in a highly complex industry, with an equally complex regulatory environment surrounding it. To ease these complexities, the company was looking for a software with superior process manufacturing capabilities; one, that could support its GMP-manufacturing needs as well.

After thoroughly evaluating all the possible options, the company decided to bring BatchMaster Manufacturing for SAP Business One on board to meet its increasingly complex manufacturing as well as regulatory needs. Apart from its robust functionalities, the other crucial reason why the company opted for the solution was the fact that it was an already validated software; one, that was validated by many of their clients. Also, being an ideal solution for pharma manufacturers, it ticked all the boxes.

With the addition of this end-to-end process manufacturing solution, the said company aims to

bolster its manufacturing, formulation and compliance management capabilities, and track down the right information in a timely manner. With this tailored [Pharma ERP](#) solution, the said pharma company can have access to industry-specific modules that work as per cGMP requirements. BatchMaster Manufacturing is not integrated, but built-in SAP Business One ERP software, which means that the company will get the combined power of BatchMaster and SAP, perks of which include a host of business benefits that allow it to harness its true potential.
