

Eastman Chief Technology and Sustainability Officer Featured in CBS Climate Week Series

KINGSPORT, TN, UNITED STATES, October 2, 2025 /EINPresswire.com/ -- Eastman (NYSE: EMN) Chief Technology and Sustainability Officer, Chris Killian, is featured in a new Climate Week interview series. The video, filmed in New York City during Climate Week, highlights the company's commitment to sustainable innovation that is being driven by Eastman's approximately 14,000 team members around the world.

“

In an age where the world faces great challenges, every day at Eastman feels like a combination of opportunity and responsibility”

Chris Killian, Chief Technology and Sustainability Officer

“In an age where the world faces great challenges, every day at Eastman feels like a combination of opportunity and responsibility,” Killian said.

Eastman is focused on material innovation to address global challenges like plastic waste, climate change and materials of concern by creating better, more sustainable and circular materials. The company produces products

that are durable and recyclable to reduce waste while preserving natural resources. It's why Eastman's team of over 14,000 people across the globe are passionate about making a difference and building a better world.

“For the sake of future generations, product innovation in the materials industry must be more sustainable,” Killian added. “That's where Eastman is advantaged. Our innovation and sustainability strategy are tightly integrated and Eastman's world class technology platforms are well positioned to serve the sustainable material needs today and the future.”

In the interview, Killian outlines key areas of focus for the company including its new methanolysis molecular recycling facility in Tennessee, its long history with cellulosic biopolymer technology and how Eastman's unique product and application development capability is directed at addressing sustainability macro trends.

“We innovate to achieve our purpose,” Killian added. “Our company exists to serve customers and consumers with products that enhance the quality of life and address those global challenges that threaten our world today and we feel good about the path we've taken and the solutions we've created.”
