The Business Research Company

The market size for capsaicin pain relief patches has experienced robust growth in the past few years. The market value is anticipated to rise from \$1.13 billion in 2024 to \$1.24 billion in 2025, marking a compound annual growth rate (CAGR) of 9.7%. This impressive growth during the

historic period can be credited to several factors such as the escalating number of people suffering from chronic pain, heightened awareness of topical pain management solutions, a growing elderly population, and the broadening range of over-the-counter pain relief products.

The market for capsaicin pain relief patches is predicted to experience a significant surge in the coming years, reaching a value of \$1.78 billion in 2029 with a compound annual growth rate (CAGR) of 9.4%. Factors contributing to

### What Are The Key Driving Factors For The [Growth Of The Capsaicin Pain Relief Patch Market?](#)

The increased occurrence of chronic pain conditions is predicted to spur the capsaicin pain relief patch market's expansion. Chronic pain conditions, which last three months or more and impede daily activities and overall life quality, are becoming more common due to the global population's aging. Elderly individuals are more prone to degenerative joint diseases and chronic illnesses that cause ongoing discomfort. Capsaicin pain relief patches help alleviate chronic pain by delivering targeted treatment, effectively reducing pain signal transmission. They offer prolonged relief through local application, enhancing comfort and supporting long-term pain management. The National Center for Health Statistics reported a rise in chronic pain among U.S. adults from 20.9% in 2021 to 24.3% in November 2024. As such, increasing chronic pain conditions are driving the capsaicin pain relief patch market's growth. The rising preference for home-based therapies is also leading to the expansion of the capsaicin pain relief patch market, as they present a convenient, cost-effective solution for pain management. Home-based therapies are medical services or treatments provided or overseen in a patient's home, as opposed to traditional healthcare settings. This preference is growing due to the aging population and increasing emphasis on patient comfort and convenience. Home care allows patients to receive treatments in a familiar setting, thereby preserving their independence and reducing healthcare costs. Capsaicin pain relief patches supplement home-based therapies by providing localized pain management, making them ideal for treating chronic conditions outside of a clinical setting. They reduce the need for frequent medical appointments by offering sustained relief and enhancing convenience and the overall quality of life. The Bureau of Labor Statistics reported that the number of home health and personal care aide employees rose by 185,120 from 3,504,230 in May 2022 to 3,689,350 in May 2023. Consequently, the increasing preference for home-based therapies is enhancing the capsaicin pain relief patch market's growth.

### Who Are The Key Players In The Capsaicin Pain Relief Patch Industry?

Major players in the Capsaicin Pain Relief Patch Global Market Report 2025 include:

- Novartis AG
- Teva Pharmaceutical Industries Ltd
- Meijer Inc.
- Sun Pharmaceutical Industries Limited
- Cipla Limited
- Grünenthal GmbH
- Hisamitsu Pharmaceutical Co Inc
- Luye Pharma Group Ltd
- Lohmann Therapie-Systeme AG
- Teikoku Seiyaku Co Ltd

## What Segments Are Covered In The Capsaicin Pain Relief Patch Market Report?

The capsaicin pain relief patch market covered in this report is segmented as

- 1) By Product Type: Low Concentration, High Concentration
- 2) By Distribution Channel: Hospital Pharmacies, Retail Pharmacies, Online Pharmacies, Other Distribution Channels
- 3) By Application: Musculoskeletal Pain, Neuropathic Pain, Arthritis, Back Pain, Other Applications
- 4) By End-User: Hospitals, Clinics, Home Care, Other End-Users

### Subsegments:

- 1) By Low Concentration: Over-The-Counter (OTC) Patches, Prescription Patches, General Pain Relief Patches, Sports Injury Relief Patches
- 2) By High Concentration: Prescription-Strength Patches, Chronic Pain Management Patches, Neuropathic Pain Relief Patches, Post-Surgical Pain Relief Patches
