

Humanizey Enhances AI Humanization Logic for Humanizing AI Text

CA, UNITED STATES, October 21, 2025 /EINPresswire.com/ -- [Humanizey](#), founded by David Holand, has recently improved its AI humanization technology to produce more natural and context-aware writing. The platform, known for turning AI-generated text into human-like language, now features an optimized linguistic model designed to better understand meaning, tone, and rhythm.

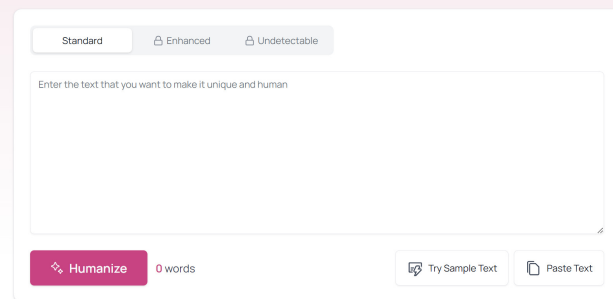

Unlike earlier versions that focused mainly on sentence restructuring, [the new Humanizey.ai engine](#) analyzes the deeper logic of each paragraph. This allows the system to refine flow, adjust tone naturally, and preserve the original intent of the text more effectively.

Early users have reported smoother results, with rewritten content showing improved readability and higher success rates when tested against AI detectors such as Originality AI and GPTZero.

Founder David Holand said the update reflects Humanizey's broader goal of enhancing how people interact with AI-generated content. "We're not just helping users [bypass detection](#),"

Undetectable AI Humanizer To Humanize Your Text

Simple input your text to be humanized and click the button, you'll get a humanized version of 100% human score and plagiarism-free. The humanized text can easily bypass AI detectors like Turnitin & GPTZero.

A screenshot of the Humanizey AI Humanizer web interface. At the top, there are three tabs: "Standard", "Enhanced", and "Undetectable". Below the tabs is a large text input area with the placeholder text "Enter the text that you want to make it unique and human". At the bottom of the input area, there is a pink button labeled "Humanize" with a small icon, and a text label "0 words". To the right of the button are two smaller buttons: "Try Sample Text" and "Paste Text".

Holand explained. "We're helping AI writing feel more authentic, expressive, and human."

The upgraded version of Humanizey is now available to all users, providing a more accurate and natural humanization experience with no additional setup required.
