

GageList Launches Crib Management for Complete Tool & Equipment Visibility

Crib Management software integrates tool check-in/out, usage history, and notifications to streamline asset control.

HOUSTON, TX, UNITED STATES, October 21, 2025 /EINPresswire.com/ -- GageList, the leader in calibration management software, today announced the launch of its new Crib Management feature, an advanced add-on designed to help manufacturers and quality teams take full control of their tools and equipment.

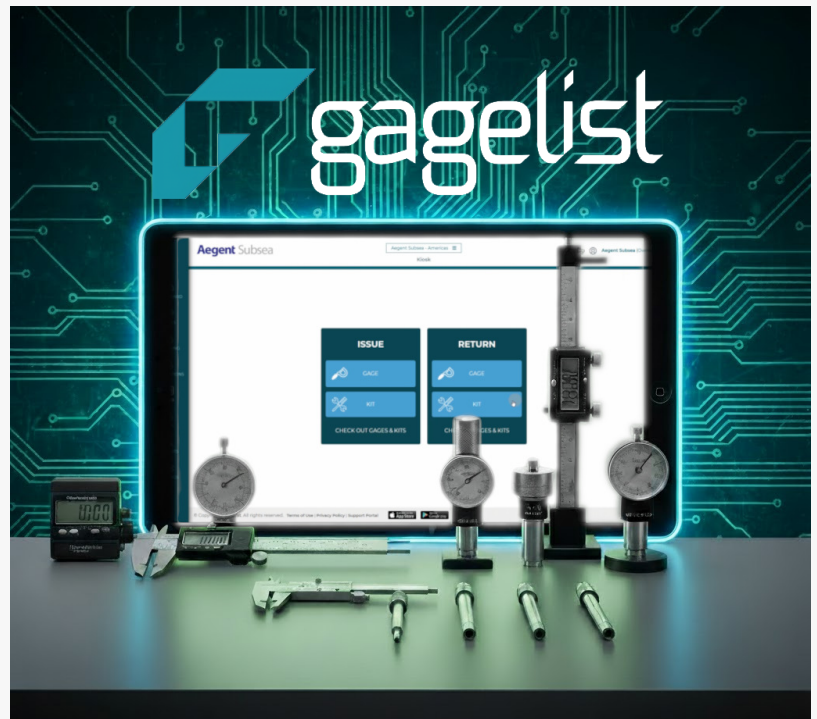

The new feature expands GageList's capabilities beyond calibration, delivering a smarter and more efficient way to manage tool check-in/check-out, track usage history, and ensure accountability across teams and departments.

"Lost or misplaced tools can lead to downtime, missed deadlines, and unnecessary replacement costs," said Scott Blankenship, CEO at GageList. "Our new Crib Management feature was built to give manufacturers real-time visibility and control—helping them save time, reduce waste, and improve quality system performance."

“

Crib Management gives manufacturers real-time control, saving time and reducing waste."

Scott Blankenship - CEO

The new GageList Crib Management dashboard allows users to digitally issue and return gages and tool kits, eliminating paper logs for precise accountability.

With the Crib Management module, users can:

- digitally check tools in and out for clear accountability
- receive automated reminders and notifications
- monitor tool history and usage from anywhere
- manage kits or tool sets as single, organized units
- assign user roles and permissions for secure access

Available as a paid add-on, Crib Management integrates seamlessly with existing GageList accounts to provide a

unified view of all calibrated and non-calibrated assets.
