

Arctic Aurora by Yan Wang Wins Silver in A' Architecture Awards

*Innovative Spa Retreat in Bergen
Recognized for Excellence in Architecture,
Building and Structure Design*

COMO, CO, ITALY, November 11, 2025 /EINPresswire.com/ -- The A' Design Award, a highly respected and well-recognized award in the field of [architecture](#) design, has announced [Yan Wang's](#) "Arctic Aurora" as a Silver Award winner in the Architecture, Building and Structure Design category. This prestigious recognition highlights the significance of the Arctic Aurora design within the architecture industry, positioning it as a notable example of innovative and functional design.

The Arctic Aurora spa retreat showcases the relevance of sustainable and environmentally conscious design in the current architecture landscape. By incorporating eco-friendly materials and energy-efficient systems, such as cross-laminated timber sourced from local forests and a geothermal pump for heating, the design aligns with the growing demand for environmentally responsible architecture. The project's commitment to sustainability and its connection to its surroundings demonstrate its practical benefits for users, the industry, and other stakeholders.

What sets the Arctic Aurora apart is its fluid, flowing form that channels the surrounding mineral-rich countryside into a tranquil inner sanctuary. The design's circular geometry enables water to move freely throughout the building, with the program gradually shifting from public to private functions. The use of innovative materials, such as triple-glazed insulated glass units and vacuum-insulated panels, enhances the project's thermal efficiency and acoustic performance, ensuring both environmental sustainability and user comfort.

Arctic Aurora

The Silver A' Design Award recognition for the Arctic Aurora serves as motivation for Yan Wang and their team to continue striving for excellence and innovation in future projects. This acknowledgment may foster further exploration of sustainable design practices and inspire the integration of nature-inspired elements in architecture. The Arctic Aurora stands as a testament to the potential of design to harmonize with its environment while providing a functional and aesthetically striking space.

Arctic Aurora was designed by Yan Wang.

About Silver A' Design Award

The Silver A' Design Award recognizes notable designs that embody excellence and innovation in their respective fields. Recipients of this award are acknowledged for their significant contributions to advancing industry standards and design practices. The selection process involves a rigorous evaluation by an expert jury panel, ensuring that winning designs demonstrate a high level of functionality, originality, and aesthetic appeal. Silver A' Design Award winners in the Architecture, Building and Structure Design category are celebrated for their innovative use of space, structural integrity, environmental impact, energy efficiency, and integration with surroundings, among other criteria.

About A' Design Award

The A' Design Award is an international, juried design competition that recognizes superior products and projects across all industries. Organized annually since 2008, the award welcomes entries from star architects, engineering firms, leading construction companies, and influential brands worldwide. By participating, entrants gain global recognition for their design excellence and contribute to advancing the architecture and design fields. The rigorous selection process involves blind peer review by an expert jury panel based on pre-established evaluation criteria. The A' Design Award ultimately aims to create a better world by recognizing and promoting designs that positively impact society.
