The online recruitment software market is expected to witness notable growth owing to increase in use of virtual recruitment, rise in need for robotic process automation and rise in use of artificial intelligence. Moreover, a rise in remote interviewing is expected to provide a lucrative opportunity for the growth of the market during the forecast period. On the contrary, accessibility issue open-source software limits the growth of the online recruitment software market.

The online recruitment software market is segmented on the basis of component, deployment mode, enterprise size, end user and region. On the basis of component, it is bifurcated into solution and services. On the basis of deployment mode, it is bifurcated into web-based and cloud-based. On the basis of enterprise size, it is divided into large enterprise and small and medium-sized enterprise. On the basis of end user, it is fragmented into IT and telecom, BFSI, retail and e-commerce, healthcare, manufacturing, government, media and entertainment, and others. On the basis of region, it is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

Competitive analysis and profiles of the major players in the online recruitment software industry include Oracle Corporation, IBM Corporation, SAP SE, Freshworks Inc., Zoho Corporation Pvt. Ltd., Skillsoft, ClearCompany, Inc., Ukg Inc., Cornerstone, and Sumtotal Systems, LLC. Major players have adopted product launch, partnership, collaborations, and acquisition as key developmental strategies to improve the product portfolio and gain strong foothold in the

online recruitment software industry.

By region, North America garnered the highest share in 2022, holding nearly one-third of the global online recruitment software market revenue in 2022, and is projected to retain its

dominance by 2032, owing to the increase in technical developments that are entirely revolutionizing the landscape of the IT industry and, in turn, encouraging the online and automated solutions for hiring process in the region. The Asia-Pacific region is projected to attain the fastest CAGR of 11.6% during the forecast period, owing to the adoption of smart technologies such as AI and ML escalates the demand for online recruitment software.

By component, the solution segment held the major share in 2022, garnering nearly one-third of the global online recruitment software market revenue, owing to adoption of businesses that use various internet-based solutions such as online advertising, job listings, social media and company websites, to source and hire the best candidates. However, the service segment is projected to attain the fastest CAGR of 11.0% during the forecast period, owing to variety of products and assistance given to businesses or groups utilizing such environments. To assist organizations to establish a transition to the online recruitment software model, these services include consulting, implementation, and migration services.

By deployment mode, the web-based segment held the major share in 2022, garnering nearly two-thirds of the global online recruitment software market revenue, owing to recruitment software systems that are accessible from any device with an internet connection, allowing recruiters and hiring managers to work remotely or on the go. However, the cloud-based segment is projected to witness the fastest CAGR of 11.1% during the forecast period, owing to subscription-based pricing model, which can be more cost-effective than traditional on-premises solutions.

By enterprise size, the large enterprise segment held the major share in 2022, garnering nearly two-thirds of the global online recruitment software market revenue, owing to wider pool of potential candidates by posting job listings on multiple job boards and social media platforms simultaneously, making it easier to reach a diverse and qualified talent pool. However, the small and medium-sized segment is projected to witness fastest CAGR of 10.4% during the forecast period, owing to advanced technologies such as artificial intelligence and automation technologies have the potential to help small & medium enterprises to compete with large organizations.

By end user, the IT and telecom segment accounted for nearly two-fifths of the global online recruitment software market share in 2022, and is expected to rule the boost by 2032, owing to software tools and platforms designed to facilitate and optimize the process of finding, attracting, assessing, and hiring talent for technology-related positions within these sectors. However, the healthcare segment is projected to exhibit the fastest CAGR of 12.5% throughout the forecast period, owing to increase in collaboration among healthcare professionals, securely store and exchange sensitive data, and improve the delivery of healthcare services.
