Market Report 2025 – Market Size,
Trends, And Forecast 2025-2034*

LONDON, GREATER LONDON, UNITED
KINGDOM, November 17, 2025
/EINPresswire.com/ -- What Is The
[Remanufactured Automotive Parts
Market](#) Size And Growth?

The Business
Research Company

The Business Research Company

In recent times, the market size for remanufactured automotive parts has seen significant growth. This market is predicted to expand from \$62.07 billion in 2024 to \$66.11 billion in 2025, showing a compound annual growth rate (CAGR) of 6.5%. The impressive growth throughout the

historic period can be ascribed to several factors such as the increase in both vehicle parc and aging fleet, surging customer demand for reasonably priced replacement parts, cost advantages compared to new pieces, the growing aftermarket distribution networks, and the heightened understanding of circular economy strategies.

In the upcoming years, the remanufactured automotive parts market is poised for robust expansion. The market is projected to achieve \$86.07 billion in 2029 with a compound annual growth rate (CAGR) of 6.8%. Factors

contributing to this projected growth during the forecast period include an increased focus on sustainability and waste reduction, intensified uptake of electric and hybrid vehicles requiring reman parts, growing regulatory approval for remanufacturing practices, escalating demand for cost efficiency in fleet management, and an expanded foothold in emerging markets. Key trends during the forecast period encompass the development of superior coating materials, advancement in accurate remanufacturing methods, amalgamation with supply chain management systems, adoption of Internet of Things (IoT) sensors, and the integration of AI-based inspection systems.

What Are The Current Leading Growth Drivers For Remanufactured Automotive Parts Market?

The anticipated expansion of the used car industry is set to stimulate growth in the remanufactured automotive parts sector. The term used car trade is used to describe the process of buying and selling previously owned vehicles among individuals or dealers. This comprises the secondary automotive market, which is influenced by factors such as the age and condition of the vehicle, and the level of demand. The growth seen in the used car trade can be attributed to the cost efficiencies it offers, as second-hand cars are cheaper than new ones, making it more affordable for consumers to own a reliable means of transportation.

Remanufactured automotive parts play a vital role in this growth, as they offer inexpensive, high-quality substitutes that ensure the vehicles' performance and reliability, thereby making used cars more appealing for prospective buyers. For example, as per the data shared by Cox Automotive, a US-based automotive technology and services provider, in February 2025, there was an 8% YoY increase in the retail sales of used vehicles in January, totaling 1.41 million units. Consequently, the expansion of the used car industry is a significant driver for the growth of the remanufactured automotive parts sector.

Which Companies Are Currently Leading In The Remanufactured Automotive Parts Market?

Major players in the Remanufactured Automotive Parts Global Market Report 2025 include:

- Robert Bosch GmbH
- BorgWarner Inc.
- ZF Friedrichshafen AG
- Denso Corporation
- Valeo SA
- Eaton Corporation
- Caterpillar Inc.
- Cummins Inc.
- LKQ Corporation
- Schaeffler Group

What Are Some Emerging Trends In The Remanufactured Automotive Parts Market?

Leading businesses in the remanufactured automotive parts industry are concentrating on creating advanced items, like remanufactured infotainment display screens, for improved vehicle functionality and lessened environmental harm. These restored, tested, and upgraded vehicle screens function identical to new ones, providing a cost-effective, environmentally friendly alternative. For instance, Stellantis N.V., based in the Netherlands, collaborated with France-based Valeo SA in April 2025 to launch a remanufactured LED headlamp and remanufactured infotainment display screen, showing their dedication towards sustainable car production and the circular economy. These headlamps save up to 50% raw material from end-of-life LED headlamps, especially the valuable LED modules, and reduce CO₂ emissions by up to 70% in

contrast to new production. With original equipment manufacturer (OEM) standards met, they offer the same performance and warranty as new parts, contributing to the progression of sustainability and circular economy measures in the automotive field.

How Is The Remanufactured Automotive Parts Market Segmented?

The remanufactured automotive parts market covered in this report is segmented –

- 1) By Part Type: Engine Parts, Transmission Parts, Electrical Parts, Body Parts
- 2) By Vehicle Type: Passenger Cars, Commercial Vehicles, Sport Utility Vehicle (SUVs)
- 3) By Material Sources: Recycled Metals, Reused Components, Refurbished Parts
- 4) By Remanufacturing Process: Core Return, Exchange, Repair
- 5) By Sales Channel: Aftermarket, Original Equipment Manufacturer (OEM), Online

Subsegments:

- 1) By Engine Parts: Cylinder Heads, Pistons, Crankshafts, Camshafts, Engine Blocks, Turbochargers
- 2) By Transmission Parts: Gearboxes, Clutches, Torque Converters, Drive Shafts, Differentials
- 3) By Electrical Parts: Alternators, Starters, Ignition Systems, Electronic Control Units (ECUs), Wiring Harnesses
- 4) By Body Parts: Bumpers, Doors, Fenders, Grilles, Mirrors, Headlights

Which Is The Dominating Region For The Remanufactured Automotive Parts Market?

In 2024, North America stood as the leading region for the remanufactured automotive parts market. The forecast period anticipates Asia Pacific to experience the most rapid growth. The report on the remanufactured automotive parts market covers regions such as Asia-Pacific, Western Europe, Eastern Europe, North America, South America, Middle East, and Africa.
