

# Elser AI Launches World's First Integrated AI Animation Production Platform and Opens Waitlist for Early Access

*The integrated platform unifies the entire animation production workflow, expected to revolutionize content creation and boost the animation content industry.*

CA, UNITED STATES, December 1, 2025

/EINPresswire.com/ -- ELSER GLOBAL

PTE. LTD. announced the opening of

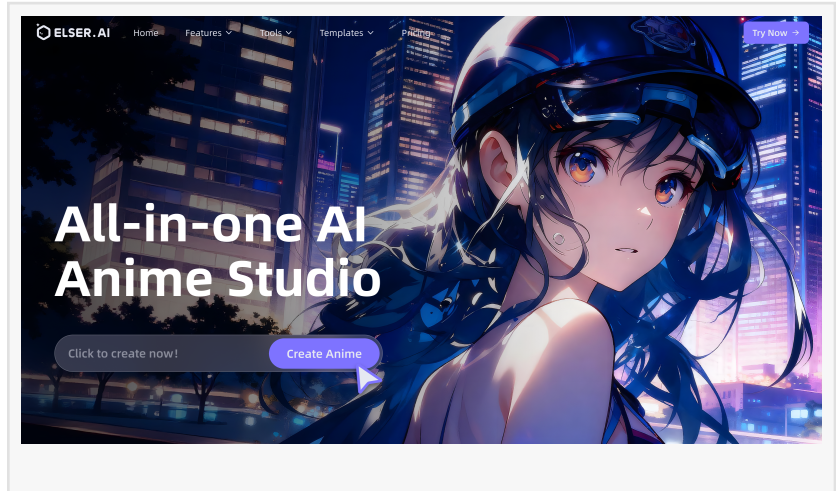

waitlist for its flagship product, "[Elser](#)

[AI](#)," a fully integrated [AI anime](#)

[generator](#) that combines the entire

animation production process. By

swiftly turning ideas into full anime videos, it is expected to reduce the average short animation production time by 95%.

Break the Traditional Animation Production workflow

“

We believe the future of the animation industry resides in the full expression of creativity. Everyone should have the opportunity to create their own animate world, and Elser AI makes it possible.”

*Phil Liu*

Traditional animation production techniques are overly intricate. With professionals from different areas, the overall efficiency is low. According to industry statistics, non-creative work has taken up more than 35% of production time. Elser AI fundamentally addresss this issue, because as an all-in-one [AI animation generator](#), it unifies the whole animation production process on one platform. Every single user can create animation only with thoughts now.

Achieve Effective and Precise Control

This AI anime short generator has powerful tools like script tool and storyboard tool, which can organize plot structure based on simple ideas, making the process easier to manage. It also has a robust camera control function. Users can continue to tweak the generated footage and

attempt different shots.

Furthermore, it automatically maintains character consistency in different settings. It also has many other modification functions, such as one-click style adjustments and fast generation of numerous image formats. Users can even construct their own character library, customizing the looking, personality, and many other aspects.

## Unleash the Potential of the Animation Industry

"We believe that the future of the animation industry resides in the full expression of creativity," stated Phil Liu, Elser AI's Founder and CEO. "Our goal, in addition to speeding up current production processes, is to significantly improve the creativity of the animation business. This will not only reduce production time, but will also result in more innovative forms and a revolution in animation copyright issues."

Elser AI greatly reduces the barrier to content creation, which will significantly drive the expansion of the animation market.

Elser AI produces short animation episodes and lengthy narratives with ease. This ability will significantly boost each creator's potential and revitalize the animation industry. Meanwhile, its ability to develop original characters (OCs) fits with the current trend of personal unique IP, which has enormous commercial potential.

Therefore, Elser AI is not just a generative AI anime tool but a strategically significant platform. Users can make their own short plays, upload them on social media, grow a following, and earn money. This convenience will significantly boost the growth of the animation content industry.

## Provide Unlimited Possibilities for Every Creator

The old era of anime is coming to an end. Today's trend of artificial intelligence is bringing endless opportunities to people.

Elser AI has established a waitlist for early access, encouraging all creators to create their own anime worlds. Early adopters will be able to test out the product in advance and provide direct feedback to the product team.

Join the waitlist for early access to the Elser AI platform at <https://www.elser.ai>.
