## What Is The Crucial Factor Driving The Global Anti-Hypertensive Drugs Market?

The burgeoning of the anti-hypertensive drug market can be heavily attributed to sedentary lifestyles. Factors such as junk food consumption, an absence of a well-rounded diet, and irregular sleep patterns due to erratic work schedules have led to a surge in hypertension. Suffering from hypertension significantly contributes to heart disease-related deaths (45%) and stroke-related deaths (51%). Therefore, the importance of medication in managing hypertension varies based on the severity of the condition. For instance, data from England's National Health Service in May 2023 shows an escalating trend of hypertension prevalence with age, from 9% in those aged 16-44, climbing to 60% in individuals aged 65 and above. This continuously progressive need for the product acts as a significant propeller for market growth.

## Who Are The Emerging Players In The Anti-Hypertensive Drugs Market?

Major players in the Anti-Hypertensive Drugs include:

- Pfizer Inc.
- Johnson & Johnson Ltd.
- F. Hoffmann-La Roche Ltd
- Merck & Co. Inc.
- AbbiVe Inc.
- Bayer AG
- Novartis AG
- Sanofi SA
- Astra Zeneca plc
- Abbott Laboratories

## What Are The Key Trends Shaping The Anti-Hypertensive Drugs Industry?

Leading businesses in the anti-hypertensive drugs market are putting an emphasis on product innovation, introducing new products like Metoprolol Succinate Extended-Release Tablets, in order to maintain a competitive advantage. Metoprolol Succinate Extended-Release Tablets are utilized in the treatment of hypertension. In an example from June 2023, the India-based pharmaceutical manufacturer Granules India Limited, launched this new tablet, which was green-lighted by the US-based federal agency, the Food and Drug Administration (FDA). These tablets target hypertension, aiming to reduce the patient's blood pressure. They are available in various strengths, including 25mg, 50mg, 100mg, and 200mg, working as beta-blockers to decrease the heart rate, minimize the heart's workload, and ultimately bring down blood pressure.
