Steady Increase in [Memory Foam Mattress Market Size from 2024 to 2029](#)

The memory foam mattress market has experienced solid growth over recent years, expanding from \$5.74 billion in 2024 to an anticipated \$6.18 billion in 2025. This represents a compound annual growth rate (CAGR) of 7.5%. This upward trend during the historical period has been influenced by increasing environmental awareness, sustainability efforts, demographic shifts, celebrity endorsements, and overall market expansion. Looking ahead, the market is projected to reach \$8.25 billion by 2029, maintaining the same CAGR of 7.5%. Factors such as rising sleep disorder cases, housing market developments, growth in e-commerce, health and wellness trends, and greater emphasis on education contribute to this forecast. Key market trends expected to emerge include smart technology integration, improved cooling features, heightened attention to sleep hygiene, intensified competition driving innovation, and hybrid mattress designs.

Understanding Memory Foam Mattresses and Their Benefits

Memory foam mattresses are made from viscoelastic foam, which molds to the contours of the sleeper's body, offering personalized support and comfort. This material effectively relieves pressure points and minimizes motion transfer, making it ideal for individuals seeking restful

and supportive sleep surfaces. Known for their long-lasting durability, these mattresses also help reduce discomfort associated with various sleeping positions, enhancing overall sleep quality.

[How E-Commerce Expansion Fuels Growth in the Memory Foam Mattress Market](#)

One of the primary drivers behind the memory foam mattress market's growth is the rapid expansion of e-commerce. Defined as the buying and selling of products and services via electronic networks, mainly the Internet, e-commerce has become increasingly popular due to enhanced internet access, convenience, and changing consumer shopping habits. Online platforms allow customers to easily browse a wide range of memory foam mattresses, compare prices and features, and make purchases from home. For example, in February 2024, the US Census Bureau reported that e-commerce sales grew by 7.5% in the fourth quarter of 2023 compared to the same period in 2022. This surge in online shopping is playing a crucial role in boosting memory foam mattress market growth.
