

Frisco ISD Expands Access to Classroom Keyboarding Curriculum

Approval under RFP 857-2024-09-30 supports typing software and K-12 keyboarding instruction

FRISCO, TX, UNITED STATES, June 9, 2026 /EINPresswire.com/ -- eReflect Inc. announced that its keyboarding and typing curriculum platform, Typesy, has been approved as a vendor for Frisco ISD under RFP Number 857-2024-09-30, Supplies & Software.

Strong typing and keyboarding skills help students participate more effectively in technology-based learning. Keyboarding instruction remains an important part of classroom technology education."

Rick Mesias, Sales Director at eReflect

As technology continues playing a larger role in education, schools are increasingly focusing on helping students develop practical typing and keyboarding skills that support everyday classroom learning. Students regularly use computers for writing assignments, online assessments, digital collaboration, and classroom communication across a wide range of academic subjects.

Many educators are seeking typing software that helps

students improve keyboarding confidence while supporting classroom technology instruction without adding unnecessary complexity to existing learning workflows. Typing fluency remains an important skill that supports productivity, participation, and communication within digital learning environments.

[Typesy for Frisco ISD](#) provides structured K-12 keyboarding instruction through guided typing lessons and interactive exercises designed to improve typing speed, typing accuracy, and keyboard familiarity. The platform allows students to progress at their own pace while reinforcing practical typing habits and classroom technology skills.

The typing curriculum can be integrated into classroom instruction across multiple grade levels while giving educators tools to assign lessons, monitor student progress, and support broader digital fluency development through classroom-friendly reporting features.

Designed primarily for K-12 schools, Typesy also supports foundational computer skills and digital fluency development through guided practice activities designed for modern learning environments.
