

PCI Implementation Training Course tackles PCI compliance

/EINPresswire.com/ [IT Governance Ltd](#), a [PCI compliance](#) leader and an approved PCI QSA company, has reported that the two-day PCI Implementation training course is essential for all professionals that need to ensure their company is compliant with the PCI DSS.

The course, delivered in both London and Manchester, can be combined with the PCI Foundation – Overview and Introduction course held in the same locations the day before. Bookings can be made online at www.itgovernance.co.uk/shop/p-1279.aspx.

Compliance with the Payment Card Industry Data Security Standard (PCI DSS) is mandatory for merchants and member service providers (MSPs) who store, process or transmit cardholder data.

Alan Calder, CEO of IT Governance, says, "In our capacity as a QSA company, our principle role is to ensure that an organisation is fully compliant to the PCI DSS requirements. Our PCI Implementation course is designed and led by an experienced Quality Security Assessor, adding value to the delegate experience.

"The content of our course reflects the level of technical and business understanding that delegates need to gain in order to meet the requirements of the standard."

The PCI DSS Implementation training course uses practical examples and real-life case studies to guide delegates through a proven methodology designed to ensure that they select the correct 'route to compliance', identify the exact requirements using gap analysis and, create an effective implementation plan.

This course also features the use of IT Governance's unique PCI DSS Documentation Toolkit, which provides all of the documentation templates for the mandatory PCI DSS policies, implementation guidelines and guidance on integrating with ISO27001 - the international standard for an Information Security Management System.

Places on the PCI DSS Implementation course can be booked online at www.itgovernance.co.uk/shop/p-1279.aspx.
