

Executive Relocation Specialist Kam Pardasani Says Rubbermaid Move To Huntersville Helps Employees

HUNTERSVILLE, NC, USA, January 7, 2014

/EINPresswire.com/ -- Kam Pardasani, a Charlotte area executive relocation specialist, says the recently announced Rubbermaid move to Huntersville, N.C. just north of Charlotte makes economic sense for the company and for Rubbermaid employees.

Charlotte area executive relocation specialist and REALTOR® Kam Pardasani says the [Rubbermaid relocation](#) from Winchester, Virginia, to Huntersville, just north of Charlotte, is a good move for employees. He says real estate price trends are favorable to relocating employees, and the town of Huntersville could see significant growth in coming years.

Pardasani, who specializes in helping Fortune 500 executives, high-level managers, and [physicians relocating to Charlotte](#), says buying a home in the Charlotte real estate market could be a great move financially for the Rubbermaid employees who are making the move.

"Home prices in the Charlotte metro area are significantly lower than those in Winchester, to the tune of about 25%," according to Pardasani. "That means buyers can get a lot more home in Charlotte by using the equity from selling their home in Winchester."

He says that published reports show about [65 employees of Rubbermaid](#) moving to the Huntersville, North Carolina area through the first half of 2014.

"Finding housing in a new area can be difficult, especially when you take into account the complexities of selling another home, finding good schools for your kids, and timing the move with job requirements," he says.

Pardasani says he specializes in helping companies like Rubbermaid make their employees' Charlotte relocation stress-free.

"We take a lot of the hassle out of relocation by being the much-needed resources on the ground that employees need when relocating long-distance," he says.

"We've found that our attention to all the details of the move just makes life so much easier for relocating employees so they can be happier at home and more productive at work."
