

Control Solutions Inc. Acquires Facility in Fowler, Indiana

Control Solutions, Inc., co-owned and run by Rodney Winebrenner, has acquired a new facility in Fowler, IN to expand their services in specialized design.

FOWLER, INDIANA, USA, July 7, 2014 /EINPresswire.com/ -- President and co-owner of Control Solutions, Inc., [Rodney Winebrenner](#), announces the purchase of a 5,000 square foot facility for specialized control panel design and fabrication. The facility is located at 206 West Main Street, in Fowler, Indiana. Control Solutions specializes in designing and fabricating programmable logic controllers (PLCs) and robotics. "Our facility was purchased to allow us the space needed to design and fabricate top-quality control panels for a variety of industries," said Winebrenner. "We specialize in many areas including welding, painting and material handling."

[Rodney Winebrenner](#) is an electrical engineer and co-owns Control Solutions along with his fiancée Melanie Russell. [Rodney Winebrenner](#) attended college at IVY Tech for an Associates degree in Electronics. He also attended LaSalle University where he earned his BS in Electrical Engineering. He first started his entrepreneurial career when he started his own company, Automated Industrial Controls, Inc. in 1996, which he later closed prior to starting Control Solutions, Inc. in 2009.

As President of Control Solutions, Rodney Winebrenner focuses on control design from concept point and provides installation services. "By trouble-shooting all of our control panel designs for top quality, we offer a peace of mind to our customers for all services and projects managed by Control Solutions," stated Winebrenner.

Rodney Winebrenner prides himself on all the training and certification provided to his engineering staff at Control Solutions, Inc. Rodney Winebrenner and his staff have training in PLC's, robotics, vision systems and varied equipment. The team at Control Solutions Inc. has 30 years of engineering experience that enables them to design, fabricate, and install specialized control panels for a multitude of industrial manufacturing needs.

Rodney Winebrenner is co-owner of Control Solutions, Inc. out of Fowler, Indiana which provides top-quality electronic control panels to the manufacturing industry for a wide-variety of uses, including welding and material handling.

Control Solutions works with customers to get the design right for their specifications. Designs are made using AutoCAD and Promis-E software, special software that is flexible enough to match a customer's current drawing specifications. "After the design process is complete, Control Solutions will go to work on the fabrication, which includes complete machine, electrical control panel, and metal fabrication," said Rodney Winebrenner. "Our company is able to machine any small or large mechanical parts necessary to modify a customer's current equipment."

On-site testing allows Rodney Winebrenner and his team the ability to solve any control issues or problems with hydraulic-pneumatic systems. "The installation process at Control Solutions is turn-key. Machinery is set up, connected and running before we leave a customer's facility. We also take care of all necessary supervision of field devices so everything is working in a stable, efficient manner," said Winebrenner.

Control Solutions, Inc. prides itself on its machine relocation and refurbishment services. "We have relocated machines all over the United States, Mexico, and Puerto Rico," states Rodney Winebrenner, President of Control Solutions, Inc. "We can handle the shipping and provide complete tear down and setup of your equipment. Refurbishment of equipment can also be done on your plant floor or during a machine move." This ensures rapid turnaround of a project to get production back up as quickly as possible.
