## Market Research Future Analysis:

Market Research Future analysis shows that the global door system market is estimated to grow at moderate rate during the forecast period. Growing consumer demand for construction, infrastructural development are the major factors driving the door system market. Technological advancement of door systems in existing buildings, increasing demand for repair & maintenance, and the growing construction industry as well as government emphasis on infrastructure are driving the growth of construction in the global door system market.

Asia-Pacific region is leading the market because of the growth in construction industry and emphasis on infrastructural development. Door system demand is growing in residential and infrastructure sector. The residential sector will witness significant growth owing to the development of smart cities. Moreover, safety concerns such as fire and security and their application in industries due to rising safety regulations are leading to the growing demand of doors, thus driving the market.
