Wiseguyreports.Com Adds “Boiler Water Treatment Chemicals -Market Demand, Growth, Opportunities and Analysis of Top Key Player Forecast To 2022” To Its Research Database

According to Statistics MRC, the global Boiler Water Treatment Chemicals Market is expected to grow at a CAGR of 6.4% during forecast period 2016 to 2022. Factors like raw feed water treatment, reduction in pre-treatment and heat exchanger equipment cost, growing popularity of zero liquid blowdown, strict boiler regulations and enhancing safety and efficiency of system are driving the market growth. Further, demand is increasing significantly in various end use industries favouring the market. However, hazardous nature of hydrazine is limiting the market growth.

The oxygen scavenger segment is projected to be the largest market in chemical type because it protects the boiler and control corrosion of the feed tank. The Scaling inhibitors segment accounted for the second largest market share in the boiler water treatment chemicals type market as it reduces the damage caused by scaling. The power sector is the leading segment in end user market followed by steel & metals, petrochemicals, food & beverages, and oil refineries. Asia Pacific dominated the global market, led by growth of the construction industry and power generation industries in China, India, Japan and South Korea. North America and Europe are growing favourably due to switch to the renewable and non-conventional sources of energy. Saudi Arabia and South Africa are expanding rapidly due to demand from oil refineries and petrochemical industries.
