

Solar Thermal Power US Market 2017–By Identifying the Key Market Segments Poised for Strong Growth in Future

Solar Thermal Power US Market 2017 - Current and Future Plans 2030

PUNE, INDIA, October 26, 2017 /EINPresswire.com/ -- Summary

"Solar Thermal Power in United States, Market Outlook to 2030, Update 2017 - Capacity, Generation, Levelized Cost of Energy (LCOE), Investment Trends, Regulations and Company Profiles", is the latest report from GlobalData, the industry analysis specialists that offer comprehensive information and understanding of the Solar Thermal market in United States.

The report provides an in-depth analysis on global renewable power market and global Solar Thermal market with forecasts up to 2030. The report analyzes the power market scenario in United States (includes conventional Hydro, nuclear and renewable energy sources) and provides future outlook with forecasts up to 2030. The research details renewable power market outlook in the country (includes Wind, small hydro, Solar Thermal and renewable) and provides forecasts up to 2030. The report highlights installed capacity and power generation trends from 2006 to 2030 in United States Solar Thermal market. A detailed coverage of energy policy framework governing the market with specific policies pertaining to Solar Thermal market development is provided in the report. The research also provides company snapshots of some of the major market participants.

Scope

The report analyses global renewable power market, global Solar Thermal market, United States power market, United States renewable power market and United States Solar Thermal market. The scope of the research includes -

- A brief introduction on global carbon emissions and global primary energy consumption.
- An overview on global renewable power market, highlighting installed capacity trends, generation trends and installed capacity split by various renewable power sources. The information is covered for the historical period 2006-2016 (unless specified) and forecast period 2017-2030.
- Renewable power sources include wind (both onshore and offshore), solar photovoltaic (PV), concentrated solar power (CSP), small hydropower (SHP), biomass, biogas and geothermal.
- Detailed overview of the global Solar Thermal market with installed capacity and generation trends, installed capacity split by major Solar Thermal countries in 2016 and key owners information of various regions.
- Power market scenario in United States and provides detailed market overview, installed capacity and power generation trends by various fuel types (includes thermal conventional, nuclear, large hydro and renewable energy sources) with forecasts up to 2030.
- An overview on United States renewable power market, highlighting installed capacity trends (2006-2030), generation trends(2006-2030) and installed capacity split by various renewable power sources in 2016.
- Detailed overview of United States Solar Thermal market with installed capacity and generation trends and major active and upcoming Solar Thermal projects.

- Deal analysis of United States Solar Thermal market. Deals are analyzed on the basis of mergers, acquisitions, partnership, asset finance, debt offering, equity offering, private equity (PE) and venture capitalists (VC).
- Key policies and regulatory framework supporting the development of renewable power sources in general and Solar Thermal in particular.
- Company snapshots of some of the major market participants in the country.

Reasons to buy

- The report will enhance your decision making capability in a more rapid and time sensitive manner.
- Identify key growth and investment opportunities in United States Solar Thermal market.
- Facilitate decision-making based on strong historic and forecast data for wind power market.
- Position yourself to gain the maximum advantage of the industry's growth potential.
- Develop strategies based on the latest regulatory events.
- Identify key partners and business development avenues.
- Understand and respond to your competitors' business structure, strategy and prospects.

Table of Content: Key Points

1 Table of Contents	2
1.1 List of Tables	6
1.2 List of Figures	8
2 Executive Summary	9
2.1 Global Carbon Emissions to Increase at a Lower rate During the Forecast Period	9
2.2 Technological Advancements and Government Support Driving Global Renewable Power Installations	9
2.3 Thermal Power is the Dominant Source in the Power Mix	10
2.4 Renewable Sources Forecast to Witness Maximum Growth	10
3 Introduction	12
3.1 Carbon Emissions, Global, 2001-2016	12
3.2 Primary Energy Consumption, Global, 2001-2030	14
3.3 Solar Thermal Power, Global, Technology Definition and Classification	16
3.3.1 Solar Thermal Power, Technology Definition	16
3.3.2 Parabolic Trough System	16
3.3.3 Central Receiver or Solar Tower System	17
3.3.4 Parabolic Dish or Concentrating Dish System	17
3.3.5 Linear Fresnel Reflectors	17
3.4 Report Guidance	18
4 Renewable Power Market, Global, 2006-2030	19
4.1 Renewable Power Market, Global, Overview	19
4.2 Renewable Power Market, Global, Installed Capacity, 2006-2030	20
4.2.1 Renewable Power Market, Global, Cumulative Installed Capacity by Source Type, 2006-2030	20
4.2.2 Renewable Power Market, Global, Cumulative Installed Capacity Split by Source Type, 2016 and 2030	22
4.2.3 Renewable Power Market, Global, Net Capacity Additions by Source Type, 2016-2030	24
...Continued
