China Bio-pesticides Market Research Report

The report is an in-depth market study providing accurate market insights including the latest trends, forecast, competitive insights, etc.

Bio-pesticides are a certain type of pesticides derived from such natural materials as animals, plants, bacteria, and certain minerals. Bio-pesticides are usually inherently less toxic than conventional chemical pesticides and have the advantages of no pollution, no residue, and high efficiency. With peoples raising awareness of pesticide residues in food, environment protection, and sustainable development, the application of bio-pesticides have a great breakthrough in the past years. Bio-pesticides will have a good prospect in the future.

The global consumption of bio-pesticides kept a sharp increase in the past few years, with a CAGR of 18%-20% in 2007-2014. China is one of important bio-pesticides supply and consumption country. There are more than 200 bio-pesticides producers and over 20 kinds of commercialized bio-pesticides in China at present. The market value of bio-pesticides in China accounted for about 10%-15% of the globally.
