

India Ambulatory Service Market latest trends, forecast and market analysis

Market Research Report on India Ambulatory Service Market

RAIPUR, CHHATTISGARH, INDIA, November 6, 2017 /EINPresswire.com/ -- Report Sellers has added a new market research report "[Ambulatory Service Market in India 2017](https://www.reportsellers.com/market-research-report/Ambulatory-Service-Market-in-India-2017)" to its offerings. The report is an in-depth market study providing accurate market insights including the latest trends, forecast, competitive insights, etc.

The market for ambulatory services in India will witness strong growth in the next five years. There has been an increase in demand for daycare services in the country owing to the convenience it offers to patients in terms of high-quality treatment at a lower cost and lesser time. The growth of medical centers providing ambulatory surgeries has increased owing to its increased demand in the country in the last few years. This rise in demand can be attributed to the growing awareness among patients regarding the benefits of such procedures, as well as the increased affordability resulting from increasing disposable income. The willingness of insurance companies as well to cover certain medical procedures that do not require hospitalization is also benefitting the market considerably.

However, few patients have a perception that the fast turnaround of ambulatory procedures results in diagnostic errors, thereby reducing the credibility of such procedures among such patients. Moreover, the view that the lack of hospitalization after such surgeries may lead to poor post-operative care has also led to a few patients opting for traditional treatments with a larger hospitalization period despite the latter's higher cost. Despite these challenges, the market is expected to grow over the next five years and exhibit a strong CAGR.
